<br><br><br>  
<p>My name is Joshua Brock Valenti however most  
people outside my family refer to me as Josh Valenti.  
I grew up in Hamilton, Ontario where I attended an  
elementary and high school, both which were in walking distance from  
my home.  
I left Hamilton in 2010 for St. Catharines to attend  
Brock University. At Brock University I completed an Honours BSc in  
Physical Geography.  
This degree provided me the chance to obtain an  
education that had a wide range of study, where most of my courses  
were geography-based.  
During my time at Brock I also partook in multiple  
chemistry and physics courses.  
<br><br>  
Past work experiences have consisted of retail for a  
number of years at Pro Hockey Life along with general labour with The  
City of Hamilton,  
both of which have provided me with a wide variety  
of skills. In addition I have recently found a great attraction  
towards the academic career,  
where I am currently working with a previous  
professor at Brock University as a research assistant.  
This opportunity has allowed me to use GIS  
background and apply it to an environmental sustainability direction.  
<br><br>  
My favourite way to spend my spare time is with

friends and family whether its playing sports or attending concerts, family and friends always makes for a great time.

My main passion is hockey, where I play goal but in the off-season I turn to the outdoor sports (golf and volleyball).

My favourite hockey team is the Anaheim Ducks, but due to the distance between me and my boys, I occasionally root for the Toronto Maple Leafs, unfortunately.

<br><br>

I have enrolled into the GIS program at Niagara College in hope to gain a better understand and knowledge of what GIS has to offer outside of the classroom.

In the future I am hoping for the opportunity to travel with work but ultimately to end up back in southern Ontario with my family.

My dream job would be a project manager working with wastewater or traffic design and I hope that the skills learned within this program would one day bring me to that job.
